PERSONAL DETAILS

Name in full: Galpale Gedara Naveen Shashipriya Rajapaksha

Name with initials: G.G.N.S. Rajapaksha

Nationality: Sri Lankan

CAREER OBJECTIVE

Network security graduate (BICT Honours, University of Kelaniya; all degree requirements completed, results awaited) with six months of cyber security internship experience at the Centre for Defence Research and Development, Ministry of Defence. Hands-on experience deploying open-source SOC tooling (Wazuh, Suricata, Zeek, TheHive, MISP), configuring routers, switches and firewalls, and building machine-learning alert prioritization for SOC triage. Seeking an entry-level role as a SOC Analyst, Network Security Engineer or Cyber Security Engineer, where I can strengthen an organization's threat detection, incident response and network defence while growing toward industry certifications.

EDUCATION

Bachelor of Information & Communication Technology (BICT) Honours 2022 – present
Faculty of Computing and Technology, University of Kelaniya, Sri Lanka

- Final semester in progress.
- Current GPA: 3.48 / 4.0, Expected class: Second Class Upper Division
- Specialization areas: computer networks, network security, software-defined networking, IoT systems.
- Relevant coursework: Cyber Security Laboratory (A), Systems and Network Laboratory (A), Advanced Communication Networks (B), Data Communication and Networking (B), Virtualization and Cloud Computing (A), Internet of Things (B+), Database Systems (A), Data Structures & Algorithms (A), Python Programming (A), Object-Oriented Programming (A), Software Engineering (B+)

G.C.E. Advanced Level Examination 2020
K/Berrewearts College, Kandy, Sri Lanka

- Stream: Technology
- Results: Science for Technology - A; ICT - B; Engineering Technology - C. Z-score: 1.78. District rank: 39 / Island rank: 631

G.C.E. Ordinary Level Examination 2017
K/Berrewearts College, Kandy, Sri Lanka

- Results: 5 - A passes, 4 - B passes

RESEARCH EXPERIENCE

Next-Generation SOC Platform with Automated Alert Prioritization, Final-year research project (Capstone), Supervisor: Mr. Madhushka Piyumal Kumanayaka, Faculty of Computing and Technology, University of Kelaniya.

- Designed and evaluated a machine-learning alert-prioritization layer for an open-source Security Operations Centre, addressing analyst alert fatigue caused by high false-positive rates in SOC triage.
- Demonstrated that conventional random-split evaluation overstates classifier performance: under leave-one-day-out evaluation, LightGBM recall collapsed from 0.99 to near zero on held-out attack days, revealing memorization of attack families rather than genuine detection.
- Tools: Python, LightGBM, scikit-learn, Streamlit, Wazuh, Suricata, Zeek, Ntopng, MISP, OpenCTI, TheHive, Cortex, Docker; dataset CICIDS2017

Secure IoT Traffic through Software-Defined Networking
Software-Defined Networking | IoT Security

- Designed and implemented an SDN-based architecture that secures IoT device traffic by separating the control and data planes, allowing security policy to be enforced centrally rather than device by device.
- Built and emulated the topology in Mininet with a Ryu controller, programming OpenFlow rules for device authentication and traffic isolation.
- Implemented the security mechanisms: DDoS detection, anomaly-based intrusion detection, dynamic isolation of compromised devices, and encrypted device-to-controller communication.

OTHER PROJECTS

Automatic Medicine Dispensing Machine - IoT research project, 2024

- Built an Arduino-based two-chamber dispenser with a custom Flutter application for remote scheduling, replacing the Blynk platform with a custom communication layer.

IoT Server-Room Security Monitoring System - CDRD internship project, 2025

- Assisted in building an IoT monitoring system streaming sensor data over MQTT to InfluxDB, with Grafana dashboards and automated SMS alerting for critical events.

Multi-Hop Proxy Network with Honeypot Detection - CDRD internship project, 2025

- Contributed to a Raspberry Pi and Linux multi-hop proxy network with dynamic IP rotation, honeypot detection, and encrypted tunnelling in Python, with dashboards visualizing routing paths and security events.

Open-Source SOC Deployment - CDRD internship project, 2025

- Supported deployment of an open-source SOC stack (Wazuh, Suricata, Zeek, Elasticsearch, Kibana, MISP/OpenCTI, TheHive, Cortex) for centralized logging, threat detection, and incident-handling workflows.

PROFESSIONAL QUALIFICATIONS & TRAINING

- Network Security Administrator — National Youth Services Council Training Centre, Dehiwala.
  (01.03.2025 to 30.06.2025. Certificate No. S 00212 issued 10.04.2026.)
- Strategies for Cloud Security Risk Management — Google Cloud Skills Boost. Completed.
- Cisco Networking Academy — Networking Essentials, Cybersecurity Essentials, IT Essentials v8, Introduction to Ethical Hacking. (In progress.)
- Offensive Penetration Testing — Cybrary. (In progress.)

TECHNICAL SKILLS

Networking: TCP/IP, OSI model, subnetting and VLSM, VLANs, trunking, STP, OSPF, BGP, static routing, NAT, DHCP, DNS, Cisco IOS configuration

Security: Firewalls, IDS/IPS, access control lists, network hardening, vulnerability scanning, penetration testing fundamentals, honeypot detection, SIEM and log analysis, threat detection, incident response.

Tools: Wazuh, Zeek, Grafana, InfluxDB, Nmap, Kali Linux, Cisco Packet Tracer, VMware Workstation, VirtualBox

Cloud: AWS and Azure networking and security fundamentals

Documentation & Media: Adobe Premiere Pro, After Effects, Photoshop, Illustrator, Canva

WORK EXPERIENCE

Cyber Security Intern - Cyber Wing Aug 2025 - Feb 2026

Centre for Defence Research and Development (CDRD), Ministry of Defence, Sri Lanka

- Contributed to a Raspberry Pi and Linux multi-hop proxy network with dynamic IP rotation, honeypot detection, and encrypted tunnelling in Python, with dashboards visualizing routing paths and security events.
- Assisted in building an IoT server-room monitoring system streaming sensor data over MQTT to InfluxDB, with Grafana dashboards and automated SMS alerting for critical events.
- Supported deployment of an open-source SOC stack (Wazuh, Suricata, Zeek, Elasticsearch, Kibana, MISP/OpenCTI, TheHive, Cortex) for centralised logging, threat detection, and incident-handling workflows.
- Configured switches, routers, and firewalls (VLANs, NAT, access control lists, network segmentation) and set up VPN, Syslog, SSH, and TFTP services; managed virtual machines and prepared technical documentation.

Technical Associate - Network & Security Solutions Jan 2023 - Aug 2023

NeuraTech (Pvt) Ltd, Sri Lanka

- Contributed to the planning and market introduction of burglar alarm and CCTV surveillance systems for residential and commercial clients.
- Configured IP cameras, NVRs, PoE switches and secure remote access across client sites.

Freelance Video Editor & Graphic Designer 2022 - Present

Self-employed, Remote

- Produce video and graphic design work for clients, funding my studies alongside full-time undergraduate study.

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

President - Students' Union, Faculty of Computing and Technology 2024 - 2025

University of Kelaniya, Sri Lanka

- Elected to lead the faculty student union, representing 1000 students to faculty management and coordinating academic and welfare activities.

Member - Information Technology Students' Association 2023 - 2024

University of Kelaniya, Sri Lanka

LANGUAGES

English - professional working proficiency (medium of instruction throughout my degree).

Sinhala - native proficiency.

NON-RELATED REFEREES

Prof. Dhammika Weerasinghe, PhD
Dean, Faculty of Computing and Technology; Professor, Department of Computer Systems Engineering
University of Kelaniya, Sri Lanka

Mr. U.K. Pathum Mihiranga
Lecturer, Department of Software Engineering, Faculty of Computing and Technology
University of Kelaniya, Sri Lanka

Referee contact details available on request.
